DESCRIPTION

I'm passionate about learning new things, the more I learn, the better I feel. The fact of stepping out of my comfort zone is an aspect that doesn't bother me. I try to keep my knowledge up-to-date. I'm passionate to work as a frontend developer. I'm used to working as part of a team, hence I try to keep good communication and a good treatment with my teammates. I know when to offer my help, and I know when to ask for help when I need it. I enjoy having a motivated environment with people that love what they do.

EDUCATION

2008-2015
Bachelor of Computer Science
Central University of Venezuela.
Specialist on Web Application Development.

Spanish: Native level

WORK EXPERIENCE

Central Bank of Venezuela. Oct-Dec 2013.

Full stack developer: I developed two web applications:

- Dashboard for work events.
- Service map to organize resources of services control department.

Technologies used:

PHP/JSP/Tomcat/Oracle/JQuery

Enoba Sistemas. Jan 2015-May 2016

Full stack developer: This role required to be able to work on the backend and frontend side. I worked with UI/UX designers along with backend developers. This experience helped me to refine my criteria about user interactions and the use of frameworks such as cakephp (backend) and angularjs (frontend).

Technologies used:

jQuery / Bootstrap / PHP / CakePHP / Angular / Jade / Sass / Gulp

Velocity Partners. May 2016-Currently

Full stack developer: I'm part of a multidisciplinary team, I work along with QA engineers, UI/UX designers and backend developers. I'm on charge of the client side environment. As a part of this team I use SCRUM as a framework in order to structure my project tasks.

Technologies used:

jQuery / Bootstrap / Handlebars / Less / Gulp
